

# Mass flow meter PERFLU 5-CA

Tailor-made for your application

also available for Zone 0/20

# Mass flow meter PERFLU 5-CA

Tailor-made for your application

## Outputs

- 4...20 mA flow
- 4...20 mA temperature
- pulse output (counter)
- 2 Relay outputs
- self diagnosis output

## Configuration

- by means buttons and display or
- via USB with PC software
- exportable for documentation

## Cable

- PVC jacket (-10...80 °C)
- silicone jacket (-50...180 °C)

All sensors are also available as HT version  
for fluid temperatures from **-40...185 °C**

## Fluids

- air
- nitrogen
- oxygen
- argon
- carbon dioxide
- methane
- hydrogen

## Sensor types

- Push-in sensor VIC  
installation with compression fitting
- Screw-in sensor SIC  
thread G1/2A
- Plug-in sensor PIC  
for sensor adapter TP or ball valve BV

## Measured variables

- standard volume flow
- standard volume (counter)
- standard flow speed
- mass flow
- mass (counter)
- operating volume flow
- operating volume (counter)
- operating flow speed
- temperature
